

ROPADIAR

ROPADAIRY

FOR DAIRY COWS

FIRST IN OREGANO INNOVATION
NATURAL, SAFE, EFFECTIVE

Ropadairy for cows is a feed natural additive and flavouring agent based on oregano oil manufactured by Ropapharm International out of Zaandam, The Netherlands.

Ropapharm International works with the Dutch horticulture research institute, PPO in Lelystad, to continue to improve the quality and consistency of the oregano plant.

Ropadairy contains highly effective oils extracted from specially selected plants.

BACKGROUND

Ropadairy has properties which can be beneficial against bacteria like Staphylococcus aureus and E-coli and shows an effect on somatic cell count and milk production. Ropadairy also contains anti-oxidants which helps to keep the temperature of Total Mixed Ration feed lower and the feed more appetizing. Different studies showed that the usage of Ropadairy resulted in a decreased somatic cell count and an increased milk production yield.

BENEFITS

- Lower Somatic Cell Counts
- Higher production
- No milk withdrawal
- Improves health
- Natural product
