

"For decades, known for its natural way of keeping pigeons ..."

Adriaan de Bruin

We are proud to say that Gary Daykin is one of our most valued customers in the UK and his performances at national level are staggering, here are some of his results from the 2013 season:

Last two old bird races of the season with the Midland National Flying Club 28th July 2013:

Blue Riband - Bordeaux National, 560 miles, 1351 birds

1st Section, 13th Open

Vire National, 286 miles, 4379 birds

1st, 3rd, 5th, 10th, 11th Section, 10th, 16th, 22nd, 52nd, 57th Open

Saturday 31st August 2013, Midland National Flying Club, Chale YB race, 3936 birds competing

1st Open, 1st Section and Gold Medal Winner

I am totally convinced of the benefits of organo and there is none better than Ropa-B"

Gary Daykin

ROPA-B

The entire Ropa-B pigeon products can be given in combination. Designed for show and racing pigeons.

Using Ropa-B products, I have achieved good results with my pigeons on the long and middle distance races this year.

B. vd Morning, Herkingen
(The Netherlands)

User Ropa-B Liquid 10% and Ropa-B Booster. This would have a beneficial effect regarding coli. This year my youngsters do not suffer any problems and have become champions.

District F Section 6 North Holland.
Johan Ackooy Hoofddorp
(The Netherlands)

"I have been using the Ropastore products as you recommended and my birds look fantastic. When I let them out to exercise they are gone for at least 2 hours. I haven't seen them look this healthy in the last 7 years!"

Erroll Skeete
London, July 2013 (United Kingdom)

"I gave Ropa-B 10% Liquid to some young birds that were showing signs of YBS and the effect was excellent. Within 2 days the birds were back to full health, I can't believe how good this product is"...

Ken Dobson
Aug. 2013

Powder 10% *Mix with the feed*

Liquid 10% *Stir into drinking water*

Feeding Oil 2% *Mix with the feed*

For a healthy digestive system based on oregano essential oil.

Increases resistance against bacteria and fungi on gastro-intestinal level.

These products can be given in combination with each other. For example, when you want Ropa-B Powder and Feeding Oil offered together, simply halve the dose of each.

Helps pigeons recover faster after a difficult and/ or long flight and also during the raising of young pigeons.

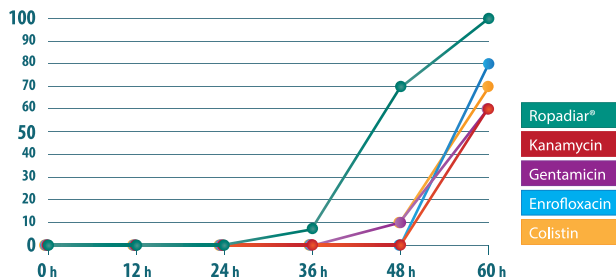

It also supports during molting keeping the intestinal flora healthy.

Unique properties:

- Tested by TNO and several clinics. Quality seal
- Helps with diarrhea problems
- Contributes to increased performance

Ropadiar emulsion on E. Coli

Drier droppings = healthier pigeons

The use of oregano is worldwide patented by Ropapharm International B.V. The product was introduced to the market in 1995.

Treatment of diarrhea after: 0, 12, 24, 36, 48 and 60 hours. Results: at 100% of the piglets treated with Ropadiar the diarrhea ceased (T0 vs. T60), while in the Baytril group this value did not exceed 79%.

No bacterial resistance

Improves immunity

Booster *Mix with the feed*

Ropa-B Booster the 'all in one' Probiotic & Prebiotic for inclusion into the feed. A unique blend of plant extracts, fermented by lactobacilli. It helps to build up the intestinal flora and activates the immune system.

Ropa-B Booster is a natural additive which maintains a strong and healthy intestinal tract stimulating digestive and immune functions of pigeons. Its active ingredients are unique, improving the immune system by enhancing the antibody response – making the birds less susceptible to disease – and the wide variety of lactobacilli aiding digestion, help them to make better use of their feed.

In addition, the soy bean meal used for Ropa-B Booster's production not only provides a rich source of protein but the fermentation process also unlocks valuable amino acids meaning less energy is required by the bird

for digestion - a significant benefit to aiding post-race recovery.

Ropa-B Booster is particularly beneficial when used to re-establish the intestinal flora following antibiotic use or vaccinations.

When fed prior to racing, the strengthening of the bacterial flora in the digestive tract enables the bird to cope better with the stress of transport and reduces the potential risk of infections from mixing with other birds.

The recovery period post racing is also shortened.

Since the product is entirely natural, there is no danger of a build-up of resistance or overdosing.

Fliteboost *Stir into drinking water*

Ropa-B Fliteboost is a unique 100% natural herbal blend to protect the respiratory system, improve immunity and digestion of show and racing pigeons.

The active ingredients come from a variety of herbs including Echinacea purpurea (purple coneflower) Tussilago farfara (coltsfoot), Eucalyptus globulus and Pimpinella anisum (aniseed). These contain properties which have an anti-inflammatory activity in the respiratory tract and also dissolve mucus, allowing more oxygen into the blood, thus enhancing the bird's performance.

Unique properties:

- For effective breathing
- For an effective oxygen transport
- Stimulates the immune system
- Supports digestion

Garlic Powder *Mix with the feed*

For a healthy digestive system based on pure garlic powder.

Increases resistance against bacteria and fungi on gastro-intestinal level.

Ropa-B Garlic Powder contributes to an optimal health (vitality and condition) and improves digestion of feed.

There is no danger of a build-up of resistance or overdosing.

Unique properties:

- Supports digestion
- Stimulates the immune system

ROPA-B Vita-Mino *Vitamins, minerals and amino acids*

Ropa-B Vita-Mino is a water-soluble powder with a high content of vitamins, minerals and essential amino acids such as lysine and methionine.

To be used during the molting period, before and after the flight, after treatment with antibiotics, vaccinations and deworming.

Environment spray

Ropa-B Environment spray contributes to good hygiene and a fresh clean loft. It also can be used for the overall care of the plumage. For optimal hygiene its regular use in the loft recommended.

When necessary it can be applied daily.

Plumage: 1-2 sprays from about 30cm (1 ft) directly on the pigeon, avoiding the eyes. When necessary rub with a cloth so that the liquid spreads nicely.

Oregano Tea

Ropa-B Oregano Tea consists of powerful antioxidants that purifies the body and calms the intestines. Also indicated during stressful periods and after strenuous exercise.

Usage: per liter(quart), add 1 tablespoon to nearly boiling water and infuse it for 2 minutes. Once it is cold, it can be used as drinking water.

It can be given throughout the year, 2 times per week.

Ultimate Multi Mineral Mixture

Ultimate Multi Mineral Mixture is a complete supplement of minerals and trace elements in addition to their daily diets. Sorely needed during breeding, moult, racing and rest season. By the rich blend of natural products, the pigeons receive that energy to recover fast and restore their reserves quickly and complete. Both by old and young birds the acceptance of this supplement is large (95-100% acceptance). The level of acceptance assures the pigeons optimum condition and a good skeletonization. It shortens the period of the moult and provides the birds a nice and silky plumage.

Ultimate Multi Mineral Mixture covers the total demand for vitamins, minerals and trace elements.
